

Application: Big Data Analytics Pipeline

Source code:

```
#include <stdio.h>

#include <math.h>

double T(int n)
{
    if(n == 1)
        return 1;

    return T(n - 1) + log2(n);
}

int main()
{
    int n;

    printf("Enter the value of n: ");
    scanf("%d", &n);

    printf("T(%d) = %.2f\n", n, T(n));

    return 0;
}
```
